EXPERIENCE

Enroute Systems

2022 - current

Monterrey, Nuevo León | Mexico.

I am currently working as a front-end developer doing React using typescript as the main programming language, for the activities we are doing are: Building a design system using storybook, migrating an old web application to React with hooks, giving styles with SASS, working agile using scrum and Jira, effective communication between different teams such as UX, backend or product team.

Key Accomplishments:

- Story books components created
- Pages created and migrated
- Typescript and react knowledge acquired
- Delivering code quality to the project
- Being valuable for the team

Uber clone web and mobile application

2020 - 2021

Colima, Colima | Mexico.

I built an Uber clone application for Android and iOS using the Flutter framework as a freelancer for a local customer that I met thanks to my classmates who recommended me. And built the web page application using React with hooks. This web controlled all the users and drivers activity.

Key Accomplishments:

- Over 2,000 users registered.
- Smoothness while using the app.
- 99% bug free.

PORTFOLIO

Tracker for Amazon and Mercado Libre

2020 - 2020

I made app trackers for the Amazon and Mercado Libre website so users could know whenever a product price goes down so they can buy it cheaper. This was possible thanks to web scrapers.

Personal portfolio

2020 - 2020

I made a [personal portfolio](#) using React so people can know more about me and the projects I have worked on.

EDUCATION

Universidad de Colima - Bachillerato 8

2015 - 2018

Colima Colima | Mexico

High school Technical programmer.

Euro American English Institute
